

Component specification

The resistance values assume a temperature of +25°C unless otherwise stated.

Designation	Type	Value	Other
Battery temperature sensor	Negative temperature coefficient (NTC) sensor	Resistance: approximately 2795 Ω	
Outer temperature sensor	Negative temperature coefficient (NTC) sensor	Resistance: approximately 1940 Ω	
Fuel level sensor, 62 liter tank.		Resistance: 62 liters: approximately 10 Ω 31 liters: approximately 107 Ω 0 liters: approximately 204 Ω	
Fuel level sensor, 55 liter tank.		Resistance: 55 liters: approximately 17 Ω 27 liters: approximately 112 Ω 0 liters: approximately 204 Ω
